

SAW GUIDE - PIPE & SAW GUIDE - TUBES

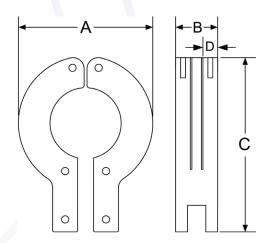

A hardened solid pin is inserted into the guide just below the finished cut line that will stop the saw blade from cutting into the guide. If the saw blade comes in contact with the pin, the pin will spin and not damage the saw blade or the guide.

Easy SetupThe wing nut design allows the guide to belocked onto the pipe without the use of external devices.

Just wrap the guide around the pipe and tighten the wing nut for the cutting operation.

The hardened steel saw guide is nickel plated to ensure non-contamination of the pipe or tube.

Double slot guide has two slots. Narrow for a Portaband and a wider one for a Sawzall blade. This is to ensure that the tolerances are kept tighter on the cut on the $\frac{1}{2}$ " thru 3.5" sizes. The 4" and 6" have single slots.

SIZE	Α	В	С	D
.50	1.75	.75	2.37	.236
.75	1.93	.75	2.75	.236
1.00	2.31	1.00	3.12	.354
1.50	2.87	1.00	3.56	.354
2.00	3.75	1.18	4.93	.413
2.50	4.25	1.18	5.25	.413
3.00	4.87	1.18	6.18	.413
4.00	4.56	1.18	7.37	.413
